

Building on the Caribbean Health AI Congress 2026

CHAIC 2026 — "Use Healthcare AI With Confidence, not Hype." What this congress offers LumaChart, who to meet, and how it complements Becker's HIT + RCM.

Source: chaicpr.com home, agenda (Sept 25 & 26) and speakers pages, read 2026-09-14 · **Sept 25–26, 2026 · Centro de Convenciones de Puerto Rico, San Juan.** Day 1 agenda captured in full; Day 2 session titles were not all published at fetch time and are characterized here from the confirmed speaker roster + time blocks (verify on-site).

Why this one matters more than it looks. Becker's is where LumaChart **sells** (CIO/CFO enterprise buyers). CHAIC is where LumaChart **gets built and funded**: it is clinician-, researcher-, and founder-centric, anchored at the **University of Puerto Rico Medical Sciences Campus** — and it sits in the exact market where LumaChart **already ships a payer bridge** (the ICD-10→ICD-9 Puerto Rico clearinghouse connector). Its themes — evidence-based AI, governance ("confidence not hype"), underserved/NIH capacity, physician entrepreneurship — line up with LumaChart's mission and its non-dilutive SBIR/STTR path far more tightly than the revenue-cycle floor at Becker's.

1 · Conference profile & program

A focused two-day, largely single-track congress (~11–12 sessions/day) blending keynotes, clinical-domain talks, hands-on AI workshops, and an **ABAIM AI Primer Course** (American Board of AI in Medicine). Tone is academic-clinical and pan-Caribbean, not vendor-exhibit-driven.

Day 1 — Thursday, Sept 25 (Opening & Foundations → ABAIM Primer)

TIME	SESSION	SPEAKER
8:00	Opening Ceremony	Dra. Myrna Quiñonez, Rectora, UPR Recinto de Ciencias Médicas
8:10	Opening Session	Dr. Orvil Martínez Rivera — Advance Medical Research Center of PR
8:40	AI Entrepreneurship	Dr. Arlen Meyers — President/CEO, Society of Physician Entrepreneurs (SOPE)
9:25–12:25	AI Agents Workshop (parallel, hands-on)	Dr. Rafael Grossmann (surgeon) · Dr. Javier Mendoza, MD PhD
9:40	Panel: AI Challenges	Nelson Ortiz · Eddie Pérez-Ruberté · Steven Núñez
11:00	AI Antibiotics (virtual)	Dr. César de la Fuente — University of Pennsylvania

11:30	AI in Radiology	Lior Eshel Ansher — Founder/CEO, TestDynamics
1:30	AI Research	Dr. Abiel Roche-Lima — Director of Informatics, UPR School of Medicine
2:00–5:30	ABAIM AI Primer Course	Dr. Anthony Chang — Chief Intelligence & Innovation Officer, Rady Children's
5:40	Networking Cocktail Reception	All attendees

Day 2 — Friday, Sept 26 (speaker-topic-derived; confirm on-site)

Day-2 slots (8:10, 9:05, 9:35, 10:30, 11:30, 1:30, 2:50, 3:20, 3:55, 4:25, 4:55) map to the confirmed roster below.

Expected anchors, by topic: **OpenEvidence** (Dr. Travis Zack), **Med-Gemma / Google** (Daniel Golden), **AI Security & Governance** (Brittney Harrell, Nabla), **underserved AI/ML capacity** (Dr. Astha Malhotra, AIM-AHEAD/NIH), **AI in Mental Health** (Dr. Humberto Cruz), **AI in Clinical Lab Medicine** (Mariano de Socarraz, CorePlus PR), and **AI in Academic Medicine / Education** (Dr. Carlos Ortiz; Dra. Yasmín Pedrogo).

2 · Who to meet (ranked by fit to LumaChart)

PERSON / ROLE	TOPIC	WHY — THE LUMACHART HOOK
Dr. Abiel Roche-Lima Dir., Integrated Informatics Services; Assoc. Prof & PI, ARL Biomedical Data Science Lab — UPR Medical Sciences Campus	AI & Biomedical Data Science	Top academic partner. A funded PI running informatics at UPR — the natural STTR research partner (eases IRB) and the anchor for the Puerto Rico beachhead where our billing bridge already lives.
Dr. Travis Zack Chief Medical Officer, OpenEvidence	Evidence-based AI at the point of care	OpenEvidence is the closest analog to LumaChart's evidence-on-the-record thesis. Study what they nailed (clinician-trusted evidence retrieval) and where LumaChart differs: evidence <i>inside</i> the record + burden reduction + certification, not a standalone lookup.
Dr. Astha Malhotra Assoc. Dir. & Program Lead, AIM-AHEAD (NIH consortium)	Building AI/ML capacity across underserved health & research institutions	Grant + mission + safety-net in one. NIH consortium focused on underserved capacity — directly relevant to the AHRQ/NLM SBIR, the public-health layer, and the safety-net beachhead.
Brittney Harrell Head of Information Security, Nabla	AI Security & Governance in Healthcare	Nabla is a leading ambient-scribe company. Two hooks: benchmark Luma Scribe, and pull real AI-security practice into our new AI-security build (Becker's "data is the attack surface").
Dr. Arlen Meyers President/CEO, Society of Physician Entrepreneurs (SOPE)	AI Entrepreneurship	The physician-founder network — fundraising-alternative, advisory, and the non-dilutive-first ethos LumaChart chose.

Dr. Anthony Chang CIO, Rady Children's; founder, ABAIM	AI in Medicine (governance/credentialing)	The field's convener; ABAIM is the credentialing/standards body for clinical AI — aligns with our NAM AI Code + transparency posture.
Dr. César de la Fuente — UPenn	Synthetic biology & computational medicine	Cross-links to Becker's Penn Medicine contacts; marquee research credibility.

Also present: Daniel Golden (Google — Med-Gemma, open medical models); Dr. Rafael Grossmann (AI-in-surgery, workshop host); Dr. Humberto Cruz (AI in mental health — ties to our PHQ-9/GAD-7 instruments); Mariano de Socarras (CorePlus Lab PR — lab interfaces); Dr. Carlos Ortiz & Dra. Yasmín Pedrogo (UPR academic-medicine leadership).

3 · Two conferences compared — overlap, redundancy & unique inquiry

You asked where the programs overlap, where they'd be redundant to attend for the same thing, and where each is unique. Summary:

AREA OF INQUIRY	BECKER'S HIT + RCM	CHAIC (CARIBBEAN)	VERDICT FOR LUMACHART
AI governance / trust	Deep (CIO frameworks, scale/pause/kill, oversight)	Core framing — "confidence, not hype"; ABAIM; Nabla security	OVERLAP Get enterprise-governance depth at Becker's; get clinical/credentialing + security nuance at CHAIC.
Ambient AI documentation	Multiple sessions (CMIO, "real time back to clinicians")	Nabla (ambient scribe) present	REDUNDANT Same message twice — one is enough; use CHAIC's Nabla contact for the security angle instead.
AI security ("data is the attack surface")	Featured session	Nabla's Head of InfoSec speaking	OVERLAP Feeds our new AI-security build from two directions.
Revenue cycle / denials / RCM	An entire half the program	Essentially absent	UNIQUE — Becker's The place to learn the RCM buyer and pressure-test the AR/coding agents. (Also the most "against" our billing-in-background ethos.)
Enterprise CIO/CFO buyers & scale	600+ health-system execs; CIO Forum	Smaller, academic/clinical	UNIQUE — Becker's Where you sell + find health-system design partners.
Evidence-based AI at point of care	Light (interop framing)	OpenEvidence CMO; the congress's intellectual core	UNIQUE — CHAIC Direct to LumaChart's thesis; benchmark + differentiate.
Academic / research partners & IRB	Some AMC CIOs	UPR faculty, AIM-AHEAD/NIH, ABAIM, UPenn	UNIQUE — CHAIC The STTR/SBIR research-partner pool.
Underserved / safety-net / public health	Minimal	AIM-AHEAD; Puerto Rico context; UPR public mission	UNIQUE — CHAIC Our beachhead + public-health layer + grant fit.
Puerto Rico market	None	The whole event	UNIQUE — CHAIC We already built the PR payer bridge — this is the room to deploy it.
Physician-entrepreneur / funding path	VC-panel angle	SOPE; non-dilutive, founder-led ethos	UNIQUE — CHAIC Matches our non-dilutive-SBIR-over-equity choice.

Clinical-domain AI
(surgery, radiology,
mental health,
antibiotics, lab, peds)

Cross-cutting

Explicit domain talks

UNIQUE — CHAIC Fuel for the 160-
specialty pack strategy.

Net: the two are **complementary, not redundant** — only ~2–3 themes truly overlap (AI governance, ambient documentation, AI security). Attend **Becker's to sell and to master the RCM buyer**; attend **CHAIC to build, validate, fund, and localize** (research partners, the evidence-AI benchmark, the underserved/NIH grant ecosystem, and the Puerto Rico beachhead).

4 · Best days & must-meet — CHAIC

It's a compact two-day congress; attend **both days**. Priorities:

- **Thu Sept 25 (Day 1):** Roche-Lima's *AI Research* (STTR partner — make this the meeting), Meyers' *AI Entrepreneurship* (SOPE), the *AI Agents Workshop* (Grossmann/Mendoza), and Chang's *ABAIM Primer*. Work the evening reception.
- **Fri Sept 26 (Day 2):** **Travis Zack / OpenEvidence** (benchmark our evidence engine), **Astha Malhotra / AIM-AHEAD** (grant + underserved), **Brittney Harrell / Nabla** (AI security), and the UPR academic-medicine leaders.
- **Three must-meets:** Roche-Lima (research/STTR + PR), Malhotra (grant/underserved), Zack (evidence-AI benchmark).

5 · How CHAIC feeds the build & the grant

- **Activate the Puerto Rico bridge:** we already crosswalk ICD-10→ICD-9 for PR payers — CHAIC + UPR + CorePlus (labs) is the room to pilot it with a real PR partner.
- **Line up the STTR research partner:** Roche-Lima's UPR informatics lab (or CU Anschutz) satisfies the SBIR/STTR research-partner + IRB requirement (see CERTIFICATION-AND-GRANT-ACTIONS.md).
- **Benchmark, then differentiate vs OpenEvidence:** evidence inside the record + burden reduction + §170.315 certification, not a standalone answer engine.
- **Pull AI-security practice** (Nabla) into the new AI-security build; align credentialing with **ABAIM** + the NAM AI Code.
- **Underserved capacity (AIM-AHEAD)** strengthens the AHRQ/NLM narrative and the public-health layer.
